PROFILE SUMMARY

Java Backend Developer specializing in Spring Boot, RESTful APIs, and JWT authentication, with expertise in scalable microservice architectures using Spring Cloud and secure backend deployments. Currently expanding into Python and FastAPI development to broaden backend expertise. Passionate about backend logic, clean architecture, and building efficient, maintainable systems

EDUCATION

2021 - 2025

INTERNATIONAL ISLAMIC
UNIVERSITY ISLAMABAD

- BS Software Engineering

PROJECTS

◆ ManiLogix - Microservices Supply Chain System

- Spring Boot, Spring Cloud, MongoDB, JWT, Eureka
- Developed a microservices-based backend for inventory, suppliers, and orders
- Implemented centralized JWT authentication and secure API gateway
- Enabled service discovery and inter-service communication with Eureka & OpenFeign

◆ Voice-Controlled Task Manager

- Spring Boot, MySQL, Dialogflow, REST API
- Built a task manager integrated with Dialogflow for voice commands
- Implemented secure RESTful CRUD operations using Spring Boot
- Combined AI with backend logic for automated task handling

◆ 2FA Login System

- Spring Boot, Spring Security, JWT, OTP
- Developed a secure 2-factor authentication system (Email/SMS)
- Used JWT for role-based access and token management
- Applied Spring Security to protect sensitive endpoints

Final Year Project

◆ FlavorFit - Meal Ordering App

- Spring Boot, MongoDB, JWT
- Built a backend for ordering meals with nutritionist support
- Secured APIs using JWT and role-based access control
- Managed users, orders, and recommendations in MongoDB

SKILLS

- Java SpringBoot
- Python FastApi
- MongoDB , MySQL
- Spring Security
- JWT
- Problem Solving
- REST APIs
- MicroServices

LANGUAGES

- English: Fluent
- Urdu: Native
